# Amey Jeurkar | Senior Frontend Engineer

+91-8669049754 jeurkaramey@gmail.com linkedin.com/in/ameyjeurkar github.com/ameyjeurkar

## Professional Summary

Senior Frontend Engineer with **6+ years of experience** designing and developing scalable enterprise web applications using **React**, **Nextjs**, **Angular, TypeScript**, **Javascript**, **Node.js and Redux**. Experienced in leading engineering teams, improving application performance, implementing secure CI/CD pipelines, and delivering high-impact digital transformation initiatives for Fortune 500 clients. Skilled in Frontend Architecture, Micro Frontends, Performance Optimization, System Design, and Agile Software Development. Spearheaded the development of highly performant, accessible, and maintainable applications while mentoring teams and driving engineering excellence. Leverage AI-assisted development using GitHub Copilot and Claude AI to accelerate delivery, improve code quality, and enhance debugging/documentation efficiency.

## Skills and Accomplishments

**AI/ Agentic Engineering:** LLM Agents, MCP, Tool Calling, Prompt Engineering, AI Workflow Automation

**Programming/Scripting Languages:** JavaScript (ES6+), TypeScript, Nodejs, Expressjs, CSS3, HTML5

**Libraries & Frameworks**: React, Next.js, Angular, Express, Node.js, Redux Toolkit, RxJS, Vite, Bootstrap, Accessibility Standards (**WCAG Standards**), Tailwind CSS, Apollo Client, GraphQL, Federated Graphs, Vite

**Testing Libraries**: Jest, React Testing Library, Karma

**CI/CD Pipeline:** Azure Pipeline, YAML Script

**Tools & Platforms:** Claude Code, Github Copilot, Git, Github, VS Code, Webpack, Babel, Postman, npm, Docker, JIRA, Azure Cloud, AWS Lambda, AWS S3, Fortify Scan, Synk

## Professional Experience

### Senior Consultant

**CES Limited, Hyderabad** **Oct 2026 - Present**

- Developed and standardized **10+ reusable Claude Code skills** to automate repetitive frontend development workflows, reducing manual effort by 30% across recurring engineering tasks.
- **Integrated AI-powered PR review agents into GitHub workflows**, automating first-pass reviews across 80%+ of eligible pull requests and **reducing repetitive review feedback by 20%**.
- L**everaged Claude Code for implementation**, refactoring, and debugging across Next.js, **reducing development cycle time by 25–30% on suitable tasks.**
- Investigated and **remediated 5+ application security findings, prioritizing high-severity vulnerabilities** and strengthening secure coding practices across the frontend application.
- Engineered a scalable Contentstack–Smartling localization workflow supporting **23+ countries in a single operation**, streamlining multilingual content publishing and reducing manual intervention across international storefronts.
- Applied **Atomic Design methodology** in Next.js to build reusable UI components, reduce code duplication, and accelerate feature development across storefront pages.
- Optimized Next.js PLP performance across product rendering, Shopify data fetching, Algolia filtering, and image loading, improving Core Web Vitals and reducing page load time by **15%**.

### Consultant

**Deloitte USI, Hyderabad** **Nov 2023 - Present**

- Led a team of **4 engineers** to build a self-service automation portal using React, enabling user input validation and PDF generation used for 3D modeling in oil & gas workflows achieving **95%+** sprint completion rate and **10+ production releases.**
- Led frontend modernization initiative by **migrating React SPA to Next.js**, **cutting server response overhead by 45%** and improving **SEO Core Web Vitals metrics** significantly.
- **Reduced JavaScript bundle size by 70%**, **improved page load performance by 40%**, and enhanced Core Web Vitals by implementing code splitting, lazy loading, WebP optimization, Brotli compression, and resource prioritization.
- **Improved Largest Contentful Paint (LCP) from 4.2s to 2.1s** and **First Contentful Paint (FCP) from 2.6s to 1.1s**, significantly enhancing user experience and Lighthouse performance scores.
- Architected and owned **YAML-driven CI/CD pipelines** that enforced code quality checks, test coverage validation, and streamlined build & automated deployment workflows resulting in deployment time reduction.
- Championed **frontend security best practices** by integrating **Snyk vulnerability scanning**, improving application security score from **F to A grade**, and mitigating dependency risks.
- Mentored **engineers** through code reviews, architectural discussions, and best practices, **reducing code review iterations by 30% and improving sprint delivery consistency to over 95%.**
- Designed and implemented scalable **GraphQL APIs with Express BFF layer** to serve high-traffic frontend and mobile applications.
- Introduced frontend observability using Azure Application Insights, **reducing Mean Time To Resolution (MTTR) by 50%** through real-time error tracking, performance monitoring, and user session diagnostics.
- Established frontend testing strategy using Jest and React Testing Library, **increasing critical user flow coverage to 80% and reducing production regressions.**

### Software Development Engineer

**Accenture, Bangalore** **Dec 2020 - Oct 2023**

- Engineered a contract management system using **React** that processes annual payments of over **$263M** and streamlines manual processes reducing time spent by **5500+ users**.
- Developed **RESTful APIs** in Node.js/Express with **custom middleware** for logging, error handling, and validation, improving maintainability.
- **Drove micro-frontend development** by creating POCs, documentation, and internal training sessions, helping teams adopt modern frontend architecture.
- Integrated accessibility best practices into reusable components, **improving Lighthouse Accessibility scores by 20%** and **ensuring WCAG compliance.**
- Reduced application bundle size from 10MB to 6.5MB through code refactoring and optimization techniques, improving **loading speed by 40%**.
- Ensured code quality using SonarQube and unit tests (Karma/Jasmine), achieving **75% coverage** and **reducing defects by 25%** across multiple releases.

## Accomplishments

- Awarded **Experiential Award & Applause Award** from Deloitte USI (2026) for showcasing leadership and creating team leading impact.
- Awarded **Outstanding Performer's Award & Applause Award** from Deloitte USI (2025) for technical knowledge and exceptional quality of work for achieving zero defect first release.
- Awarded **Accenture Celebrates Excellence(ACE) Award** from Accenture for year (2023), showcasing teamwork & delivering exceptional results

## Education

**Bachelor of Engineering: CGPA- 7.22/10** **2016 - 2020**
Yeshwantrao Chavan College of Engineering

**Senior Secondary (12th): Percentage- 72%** **2016**
Balaji Convent High School and Junior College

**Secondary (10th): CGPA- 9.2/10** **2014**
Ira International School
